

Latest Release Update, June 2022

FleetRadar™ 4.2, June 4th, 2022

New & Improved

New information: Account update from June 26th

FleetRadar™ users will need to perform an account update (including email verification and password reset) from June 26th. The information on the login page is a temporary friendly reminder to update your account from June 26th upon receiving the account update email. [Click here to watch](#) already how to update your account.

Improved vehicle Inspection performance and user interface

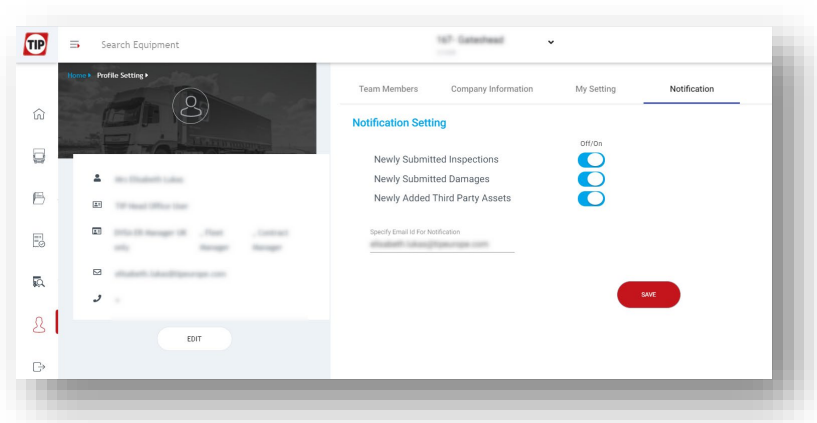

Vehicle inspection application users can now access up to 25000 submitted vehicle inspection records. The records of submitted vehicle inspection reports can be accessed via the *FleetRadar™* Vehicle Inspection module. Please note, that the increased number of reports available might increase loading times.

1. Vehicle Inspection module navigation:
 - Pagination has been introduced (100 reports per page)
 - The total available number of reports is visible and the currently displayed ones
 - Responsive arrows lead to the next/previous page or to the very first/last page

Inspection Id	TIP Unit Number	Inspection Type	Submitted By	Submission Date	Status	Reference Number	License Number	Organisation	Location	Action
169256	169256	Check Out	169256	12/05/2022 16:28	Existing Damage		169256	169256		download
169255	169255	Check In	169255	12/05/2022 16:06	Existing Damage		169255	169255		download
169254	169254	Check Out	169254	12/05/2022 17:48	No Damage		169254	169254		download

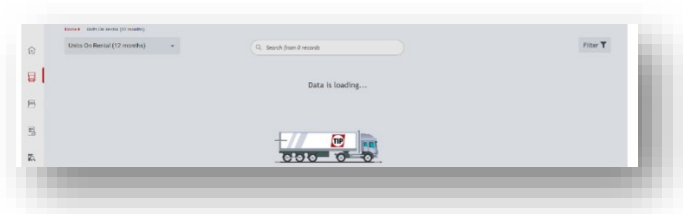

2. Vehicle Inspection module notification settings:

The notification settings relating to Vehicle Inspection reports in the “*my profile*” section have been optimized to show its main functionality for easier navigation.

New design

While *FleetRadar™* is busy preparing the information you need, you can see that a new visual in form of a commercial vehicle indicates the loading of the page.

Improved data export functionality

The export functionality in *FleetRadar™* modules has been improved. Upon choosing a different language than English and exporting a data table as EXCEL, PDF or CSV file, the document will be translated into the chosen language.

Improving the overall quality of the translations is a continuous effort of our *FleetRadar™* development, which we are still working on.

The updated version is automatically available to all *FleetRadar™* users. *

*Improvements of the Vehicle Inspection module are only visible to TIP Vehicle Inspection Application customers and upon activating the module in *FleetRadar™*.

FleetRadar™ 4.1, May 3rd, 2022

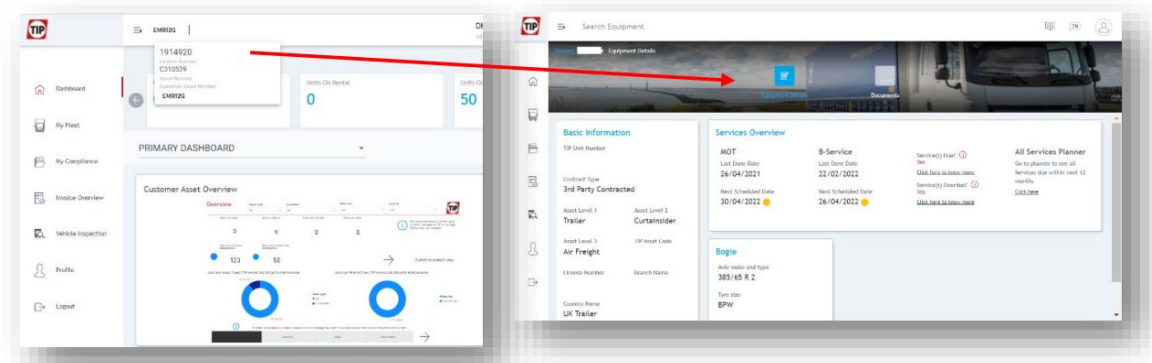

New & Improved

New search functionality: Customer Asset Number*

You can now search for a specific asset by Customer Asset Number. Clients who are sharing their own vehicle or fleet identification numbers assigned to assets on hire or maintained by TIP with a TIP representative, were already able to see the identification number per asset in the column “Customer Asset Number” in data tables (e.g., in My Fleet or My Compliance).

From now on, by entering the asset identifier in the top left search bar and clicking on the suggested asset, *FleetRadar™* will take you directly to Equipment details, from where you can also access asset related documents.

**Search Equipment details by Customer Asset Number*

Introduction of a new *Help* section You can now access support materials, such as release notes and future support collaterals via the *Help* button on the top right menu bar.

Improved user interface

- Rearranged menu bar tool tips for better navigation
- Adjusted data tables to increase the number of rows shown at a time
- Removed redundant y-axis parameters in the fleet profile configuration section

Improved application stability due to minor bug fixes

The updated version is automatically available to all *FleetRadar™* users.

FleetRadar™ 4.0, November 2021

New & Improved

Introduction of the *Invoice Overview Module*:

View paid and outstanding invoice information as new feature accessible via the left sidebar. You can access details of invoices or view all paid and outstanding invoices in one glance via a tabular view. Export functionality is available.

The feature requires activation by your TIP contact before Admin users can activate it for fellow users. After the activation re-login is required.

Improved language translations:

French has been updated

FleetRadar™ 3.0, June 2021

New & Improved

Introduction of *Primary Dashboards* to access standard reports created by TIP

1. Customer Asset Overview as Power BI embedded reporting tool

The Customer Asset Overview is a standard report providing you with complete fleet overview and enabling quick drill through to key datasets.

The report is made up of 3 tabs, 2 (*Fleet Overview* and *Reservations*) available to all users having a FleetRadar™ profile of “Fleet Manager” or “Contract Manager” + 1 additional tab (*Rates*) for users having a profile of “Contract Manager”.

The report is updated daily overnight.

The profile requires activation by your TIP contact before Admin users can activate it for fellow users.

FleetRadar™ 2.0, May 2021

New & Improved

Introduction of new fields in *Equipment details*

Contract Type: Rental/ Leasing / Unit on Contracted Maintenance / Unit on Non-Contracted Maintenance Contract Types have been added

- The Equipment high level breakdown: 3-Level breakdown of the asset: ie Trailer/Reefer/MultiTemp
- TIP Branch: showing the responsible TIP primary branch for this trailer

Introduction of new *Service Overview* section in *Equipment details*

1. Service Overview as new tab

Keep track of compliance events supported by country rules of due/overdue services.

- Last done date: shows last date executed for Compliance services (MOT and B-Service)
- Next scheduled date: shows Compliance next due date (MOT and B-Service)
- Traffic light system to visually provide sense of urgency for these main Compliance Types (MOT and B-Service)

Green: compliant, Amber: compliant, but service coming up soon, Red: service passed due

FleetRadar™ 1.0, July 2020

New & Improved

Introduction of FleetRadar™ standard functionality

Live tiles on the top inform about the current fleet status. Model dashboards load as standard and Fleet Overview Module accessible via the left sidebar to review 12 months of historic data on an asset level. The Compliance Overview Module helps you monitor upcoming and historic service events.

Service and asset related documents can be accessed and downloaded.

Admins can create fellow users allow self-managing user access to your organisation
